

Carbon Reduction Policy

The environment in which we work and live has never been subjected to as much change as it is now experiencing. Population growth, use of finite resources and greenhouse gas emissions from human activities are taking their toll in many ways not least of all through climate change and pollution. Unfortunately, as we see in our work.

AC1 Electrical Services is committed to reducing the environmental impact of our operations and will ensure that all is done to mitigate climate change and the adverse impact this has on the world.

We are committed to complying with applicable legislation in all the jurisdictions and will share achievements with all stakeholders in and outside the organisation.

This policy has been produced in line with, and should be interpreted in the light of, our organisational values: compassionate, courageous, inclusive and dynamic.

The aim of this policy is for AC1 Electrical Services to control its impact on the environment through the following objectives: -

- Minimise our contribution to pollution by reducing our carbon emissions and waste together with recycling, reusing and reducing wherever possible
- Assess the adverse effects our operations/partnerships may have on the environment and seek ways to minimise them
- Introduce into our procurement practice supplier selection criteria based on a minimum environmental standard
- Promote environmental awareness to all stakeholders including the induction of new staff and volunteers
- Monitor, report and reduce carbon emissions specifically from heat and power

All of our people are responsible for complying with this policy and supporting our efforts to minimise our impact on the environment.

Management and all those in a supervisory role have the responsibility for implementing the policy within their areas of responsibility and should ensure that environmental issues are given adequate consideration in the planning and execution of our operations, services and programs.

We will ensure we operate within all environmental, legal and other requirements as the law and best practice.

Where applicable, AC1 Electrical Services will comply with commissioners' environmental/carbon reduction policies and initiatives.
